13. ADMINISTRATION

Administration of Grand Canyon National Park and adjacent Federal lands (including that part of Glen Canyon National Recreation Area between Glen Canyon Dam and Lees Ferry, Arizona)

This part comprises items broadly relating to the administration of the national park and earlier administratively sectioned lands. But it lists more than documents pertaining to bureaucratic procedures and regulations. Also included here are references that pertain to land use practices affecting the politically defined unit; some items relating to historic structures; management documents derived from environmental studies on public lands; public comments on, and responses to, proposed and implemented studies and management decisions; and general articles and published opinions that relate to legislative issues affecting the protection, operation, and public use of the lands of the political unit.

For less similarly related items, see also:

14. Human Affairs for sociological, recreational, and economic analyses of visitation profiles, visitor experiences, and social concerns of authorized concessions in the national park, and for similar analyses of the impact of legislatively mandated operational changes to the economic and power supply mandates of Glen Canyon Dam

15. Health and Safety for issues relating to human health and safety, including those that discuss and contribute to administrative decisions on management issues

18. Environment—Physical Ecology for ecological studies that discuss and contribute to administrative decisions on management issues

19. Environment—Biological for ecological studies relating to management of living organisms

20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

21. Geology for physical and geological studies of environment that discuss or contribute to administrative decisions on management issues

18. ENVIRONMENT—PHYSICAL ECOLOGY

Physical, chemical, biophysical, and biochemical aspects of land, water, and atmospheric ecology, and historical aspects of environmental research, relating to the Grand Canyon region and the Colorado River corridor through the Grand Canyon

This part includes studies of biological ecology that is not organismically specific and environmmental studies that have been part of scientific investigations conducted for the purpose of environmental management of public lands in the Grand Canyon region. This part also includes general articles that pertain to environmental issues in the Grand Canyon region.

For items pertaining to natural history in the lower Colorado River corridor, below Lake Mead, see **11. Lower Colorado River—Natural History** and **12. Lower Colorado River—Projects**.

For related items, see also:
13. Administration for items on policy input and management documents drafted as the result of environmental studies, and public comments on these documents
14. Human Affairs for economic and sociological impacts of dam operations and river flows
15. Health and Safety for human health issues of environment in Grand Canyon and on the Colorado River
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
21. Geology for physical and geological environmental impacts
22. Hydrogeology for environmental impacts to the hydrogeological regime of the Colorado River

19. ENVIRONMENT—BIOLOGICAL

Organismal biology and biological investigations in the Grand Canyon region and the Colorado River corridor through the Grand Canyon

This part includes documents on biological censuses and the biology of animal, plant, and protist organisms as occurring in the Grand Canyon region. This part also includes biological reports and studies that have been part of scientific investigations conducted for the purpose of environmental management of public lands in the Grand Canyon region.

For items pertaining to natural history in the lower Colorado River corridor, below Lake Mead, see:
11. Lower Colorado River—Natural History
12. Lower Colorado River—Projects

For related items, see also:

20. GCES

Glen Canyon Environmental Studies technical reports and related documents produced under the monitoring and research programs of the Glen Canyon Dam Environmental Impact Statement as mandated by Congress

The Glen Canyon Environmental Studies (GCES) were created to perform as an interagency body under the direction of the U.S. Department of the Interior, Bureau of Reclamation. It responded to a Congressional mandate to develop an Environmental Impact Statement on the effects of hydropower production at Glen Canyon Dam on the Colorado River and its riparian community downstream through lower Glen Canyon and the Grand Canyon. The EIS also examined the potenial impacts of management decisions on social and economic issues. The GCES went through two phases, and the EIS was completed in 1995. Also see **13. Administration** for various management issues and decisions related to the GCES.

The GCES was such an important part of the scientific and cultural study of the Grand Canyon, specifically in the previously little-studied Colorado River corridor, that the products of these studies are a bibliography in their own right. Many of the documents are interdisciplinary, thus also a justification for listing them separately, rather than in several places throughout this bibliography. Historians of science will also notice in this list that some of the subjects were reported in other scientific publications. A few of the reports were also released in their entirety as U.S. Geological Survey Open-File Reports or publications of the National Academy Press; these are itemized here. Most of the reports listed here, and voluminous supporting data, are archived at the Grand Canyon Monitoring and Research Center, Flagstaff, Arizona. Complete information for this list is still being compiled.

Enumerated entries following the sequence for this bibliography do not necessarily pertain to individual reports; some refer to study groups, various reports of which are archived.

Principal Investigators: Stanley Beus, Charles Avery, Lawrence Stevens, Matt Kaplinski, Hilary Mayes, Brian Cluer
20.155 Draft — 31 October 1992
20.156 Final — 31 January 1993

P4 Cultural Resource Studies
An inventory of the cultural resources of the Grand Canyon, Arizona.
Principal Investigators: Helen C. Fairley, Peter W. Bungart, Christopher M. Coder, Jim Huffman, Terry L. Samples, Janet R. Balsom
20.157 Draft — 31 December 1992
20.158 Final — 31 March 1993

P5 Bald Eagle Report
Influences of Glen Canyon Dam fluctuating flows on spawning rainbow trout and wintering bald eagles, with observations on the effects of human-bald eagle interactions on the Colorado River in Grand Canyon National Park, Arizona.
Principal Investigators: Linn Montgomery, Charles van Riper III, Bryan Brown, William Leibfried
20.159 Draft — 31 December 1992
20.160 Final — 31 March 1993

P6 Nutrient Cycling
Influence on geochemical processes on nutrient spiralling within the recirculation zones of the Colorado River in the Grand Canyon.
Principal Investigators: Rod Parnell, Jeff Bennett
20.161 Draft — 30 April 1995
20.162 Final — 1 July 1995

P7 Historic Vegetation Changes
Evaluation of the current and historical riparian vegetation trends in Grand Canyon using multitemporal remote sensing analyses at the Geographic Information System long-term monitoring study sites.
Principal Investigator: Gwen Waring
20.163 Draft — 30 September 1994
20.164 Final — 31 December 1994

P8 Fluvial Marsh Study
Effects of interim flows from Glen Canyon Dam on riparian vegetation along the dam regulated Colorado River in Grand Canyon, Arizona.
Principal Investigators: Lawrence Stevens, Tina Ayers

20.165 Draft — 1 October 1994
20.166 Final — 1 January 1995

P9 Paleoflood Study
A 4500-year record of large floods on the Colorado River in the Grand Canyon, Arizona.
Principal Investigators: Jim E. O'Connor, Lisa L. Ely Ellen E. Wohl, Lawrence E. Stevens, Theodore S. Melis, Vishwas S. Kale, Victor R. Baker
20.167 Draft — 31 January 1993
20.168 Final — 30 April 1993

P10 Recreation Study
Effects of the operation of Glen Canyon Dam on campsite size in the Grand Canyon, Arizona.
Principal Investigators: LIsa Kearsley, Kathy Warren
20.169 Draft — 30 April 1993
20.170 Final — 30 August 1993

P11 Evaluation of Daily Beach Changes
An evaluation of the effects of the interim flows from Glen Canyon Dam on the daily change of beach area in Grand Canyon, Arizona.
Principal Investigators: Brian Cluer, Lee Dexter
20.171 Draft — 30 June 1994
20.172 Final — 30 September 1994

P12 Evaluation of Aerial Photography of Sediment Deposits
An evaluation of the annual effects of the interim flows from Glen Canyon Dam on the sediment deposits in the Grand Canyon, Arizona.
Principal Investigator: Brian Cluer
20.173 Draft — 31 March 1994
20.174 Final — 28 June 1994

P13 Eddy Dynamics
Evaluation of the effects of interim flows on the deposition of sediment in eddies in the Grand Canyon, Arizona.
Principal Investigator: Brian Cluer
20.175 Draft — 31 January 1995
20.176 Final — 30 April 1995

P14 Waterfowl Study
An evaluation of the effects of the operations of Glen Canyon Dam on the waterfowl resources in the Grand Canyon, Arizona.
Principal Investigators: Lawrence Stevens, Natasha Kline
20.177 Draft — 30 April 1995 (21 October 1991)
20.178 Final — 30 August 1995 (31 October 1993)

P15 Willow Flycatcher Survey
Southwestern Willow Flycatcher surveys along the Colorado River in Grand Canyon National Park and Glen Canyon National Recreation Area, 1992.
Principal Investigators: Mark Sogge, Timothy Tibbitts
20.179 Draft — 7 December 1992 (draft ?)
20.180 Final —

P16 Lower Trophic Level Study
Interim flow effects on lower aquatic trophic levels in the Colorado River in Grand Canyon, Arizona.
Principal Investigators: Lawrence Stevens, Dean Blinn
20.181 Draft — 1 October 1994

20.182 Final — 1 January 1995

P17 Avifaunal Monitoring
Avifaunal monitoring during the interim flows, including the southwestern willow flycatcher, the bald eagle, and obligate riparian avifauna.
Principal Investigator: Mark Sogge
20.183 Draft — 1 October 1994
20.184 Final — 1 January 1995

P18 Recreation Monitoring
Monitoring the effects of interim flows from Glen Canyon Dam on sand bar dynamics and campsite size in the Colorado River corridor, Grand Canyon National Park, Arizona.
Principal Investigators: Stanley Beus, Matt A. Kaplinski, Joseph E. Hazel, Linda A. Tedrow, Lisa H. Kearsley

Q. National Park Service, Glen Canyon National Recreation Area

Q1 Water Quality Study
An evaluation of the effects of interim flow operations on the water quality of the Colorado River from Glen Canyon Dam to Lee's Ferry, Arizona.
Principal Investigators: Clive Pinnock, C. Wood, D. Tinker
20.189 Draft — 30 June 1993
20.190 Final — 30 September 1993

Q2 Waterfowl Study
An evaluation of the effects of interim flow operations on the waterfowl in the Colorado River from Glen Canyon Dam to Lee's Ferry, Arizona.
Principal Investigators: Clive Pinnock, C. Wood
20.191 Draft — 30 June 1993
20.192 Final — 30 September 1993

Q3 Cultural Resource Report
An evaluation of the effects of the operations of Glen Canyon Dam on the cultural resources from Glen Canyon Dam to Lee's Ferry.
Principal Investigators: Christine Kincaid, Tim W. Burchett
20.193 Draft —
20.194 Final —

Q4 Paiute Ethnographic Report
An ethnographic evaluation of the use of the Grand Canyon, Arizona by the Paiute tribes of Arizona and Utah.
Principal Investigators: Richard W. Stouffle, David B. Halmo, Michael J. Evans, Diane E. Austin
20.195 1st preliminary draft — 24 June 1993

21. GEOLOGY

Physical and historical geology of the Grand Canyon region (including groundwater hydrogeology but excluding hydrogeology of the Colorado River and other surface waters)

This part includes works about the geology and paleontology of the Grand Canyon (excluding the hydrogeologic regime of the Colorado River), stratigraphic studies of Grand Canyon's rock units beyond the canyon-proper, studies of the structure and tectonics of southwestern North America where embracing the Grand Canyon region, historical investigations of the Cenozoic evolution of the Grand Canyon and the lower Colorado River, and modern groundwater studies of the region.

22. HYDROGEOLOGY

Hydrogeology of the Colorado River and tributary surface waters in the Grand Canyon — including hydraulic investigations of the river, sedimentary studies in the river corridor, surface-water resources, and hydrogeological investigations relating to proposed engineering projects in the river corridor between Glen Canyon Dam and Lake Mead

This part encompasses all physical studies of the water flow (hydrology) of the Colorado River, applied research on its carried sediment, and the effects of the river's flow on the distribution of sediment on the banks of the river.

Also see:

25. GENERAL MAPS

Separately published maps, charts, and atlas sheets that include the Grand Canyon or the lower Colorado River region (excluding geologic and special topographic maps)

There are hundreds of maps which probably could be listed here, but only those which have come to my attention are included. The catalogues of map dealers include many maps that cover the Southwest; unfortunately, their citations are incomplete and often the illustrations are too small to read pertinent author and publisher data from the map.

Also see entries listed in *Official map publications; a historical sketch, and a bibliographical handbook of current maps and mapping services in the United States, Canada, Latin America, France, Great Britain, Germany, and certain other countries*, by Walter Thiele, under the direction of A. F. Kuhlman (American Library Association, Chicago, 1938, 356 pp.); and *Vegetation maps of North America*, compiled by A. W. Küchler and Jack McCormick (International Bibliography of Vegetation Maps, A. W. Küchler, ed., Volume 1, Anton W. Van Bekhoven, Naarden, 453 pp.).

31. NEWSPAPER GUIDE

Brief guide to newspaper titles of the Grand Canyon region (and a supplemental list for Yuma, Arizona)

Introduction

Newspapers are a valuable resource to the historian. Long-running papers of any town or city are important historical documents, but researchers who bask in the thrill of finding the obscure and unusual anecdote, small-town and out-of-print newspapers are a mine of information.

This list of newspapers does not imply that it is exhaustive, nor is there any guarantee that all of them have had coverage of events or people of the immediate Grand Canyon or lower Colorado River regions. But within these regions it is likely that newspapers published there have had a higher frequency of Canyon- and River-related items than the newspapers of more distant places. This list provides a sampling of newspapers of northern Arizona, southern Nevada, and southern Utah. A special supplement to the Arizona list includes newspapers of that crossroads of the far Southwest, Yuma.

Arizona
- Ash Fork
- Camp Verde
- Cottonwood
- Flagstaff
- Fort Whipple
- Grand Canyon
- Holbrook
- Kingman
- Page
- Peach Springs
- Prescott
- Williams
- Window Rock
- Winslow
- (and Yuma)

Nevada
- Boulder City
- Goodsprings
- Henderson
- Las Vegas
- North Las Vegas
- Pioche
- Searchlight

Utah
- Beaver
- Cedar
- Parowan
- St. George

In the citations, places of publication are included in parentheses unless the name of the town forms a part of the title. In all, 59 titles are from Arizona (with 19 more in the Yuma supplement), 25 from Nevada, and 18 from Utah.

The earliest newspaper of the Grand Canyon region appears to have been the semiweekly *Arizona Gazette* (Prescott), beginning in 1866, although the *Arizona Daily Miner* (Prescott) began at about the same time. Several other newspapers started up in the late 1860s, and a majority of papers began in the 1870s-1890s; most, however, were short-lived. In Yuma, the earliest newspaper was apparently the weekly *Arizona Free Press*, beginning in 1871.

Local libraries can assist the researcher in finding the repositories of these newspapers. Many of the publications may be available on microfilm. Several comprehensive guides are available, in which the repositories are listed:

Items not about the Grand Canyon but having a Grand Canyon venue or otherwise borrowing the name "Grand Canyon"

This part contains citations which are themselves not about the Grand Canyon but refer to the Grand Canyon as a venue; for example, meetings and conferences about subjects other than the Canyon held at Grand Canyon. While they do not specifically contain information about the Canyon, that they took place there makes them peripherally a part of the history of the Canyon.

See **33. "Other" Grand Canyons** for items relating to other geographical features that use the appellation "Grand Canyon".

33. "OTHER" GRAND CANYONS

Works that refer to other geographic features of the world and elsewhere that use the appellation "Grand Canyon" or make comparisons to the Grand Canyon, and works in which there are metaphorical references to the Grand Canyon

This section lists citations that pertain to other geographic features that include "Grand Canyon" as part of their names; for example, "Grand Canyon of the Yellowstone" or "The Little Grand Canyon". This section also contains: citations of articles which in some way compare the magnitude of other geographic features—on Earth and elsewhere—with the Grand Canyon; cite the Grand Canyon as the superlative chasm of the world; as well as more abstract comparisons, such as "the equatorial Grand Canyon", a concept of global economics. Exception is made here to this bibliography's exclusion of newspaper items; and further, to document the appearance of such items, this part includes such ephemera as advertising flyers, postcards, and some items that we have seen on the Internet, with the realization that the last category is especially ephemeral. For the Internet citations, the date is given for when seen by the compiler. Annotations provide quotations or the context in which the reference to the Grand Canyon appears. This documents all such references and comparisons to the Grand Canyon as have come to the attention of the compiler and contributors. For a published listing, now incomplete, of other known geographic features named "Grand Canyon" and "Colorado River", refer to the article by Corax and Abyssus (1996). The Geographic Names Information System managed by the U.S. Geological Survey is also a useful Internet resource at http://www-nmd.usgs.gov/www/gnis/index.html. The Defense Mapping Agency provides a similar resource for geographic names outside of the United States at http://164.214.2.53/gns/html/index.html.

34. MISCELLANEOUS MANUSCRIPTS

Manuscript materials originally cited in the bibliography or intended for inclusion in the Internet edition; subsequently removed but retained here for archival purposes

Earlier editions of this bibliography included some manuscript resources that should not have been cited. It is beyond the purview of this bibliography to list manuscripts and unique copies of reports. When such were originally added, it was believed that they were of sufficiently unique or special interest to warrant listing them; usually, a notation was appended to indicate the reference from which the citation was obtained; this was intended to be a means by which interested readers could refer back to the original citation to establish the context of the citation. These manuscript materials have been deleted from the formal parts of the bibliography, but they are retained in this part so as not to lose useful (even if not comprehensive) information that had been in previous editions. Citations which lack a cross-reference to *Monograph 8* are items that were compiled for inclusion in the present edition. In one instance, a copy of an unpublished report appeared in a bookseller's annotated catalogue. For each citation, the part of this Internet edition of the bibliography for which it had been intended is indicated.
